

I recently learned of Sinclair Broadcasting's plans to air a movie created by the Swiftboat Veterans, without airing a comparable piece of the opposing point of view.

It is truly frightening that a media company like Sinclair is choosing to become a tool of politicians. The airwaves must be better regulated to prevent this kind of manipulation of our democracy.

We depend on the FCC to keep our airwaves fair and balanced and not allow them to be manipulated by politicians or corporations. Without adequate regulation the people are not justly served.

The FCC should step in to stop this airing immediately!

If this is allowed to happen, the honor of Sinclair Broadcasting and the FCC will definitely have been stolen!
